Ahmad Abdul-Jawad Mahmoud

Engineering Lead / **Engineering Manager**

12+ years building · 8+ leading teams · Cairo → Riyadh · millions of users across MENA

12+ YEARS ENGINEERING

8+ YEARS LEADING TEAMS

7 yrs YEARS AT THE SAME TEAM

20+ PEOPLE MANAGED ON THE PEO I LED

```
/**
 * Engineering Lead — 12+ years building, 8+ leading, including seven
 * consecutive years running the same 5+ engineer iOS team and a
 * product's growth into an enterprise POS serving 20k+ restaurants.
 * I grow engineers, protect the quality bar, and make delivery predictable:
 * onboarding, mentoring, code review, technical strategy, and shipping with
 * product and design.
 * Still technical-through: I architect, I review, and I recently shipped
 * a full ride-hailing platform solo across iOS, Android, backend and web.
 */
```

how_i_run_a_team() — 4 pillars

[01] people & growth

Grow engineers, not just features

Seven years with one team — onboarding, mentoring, career conversations, and pairing on the problems that actually break.

- Retention through a seven-year product

[02] delivery & predictability

Estimates the team can keep

CI/CD built from nothing, suites that gate merges, and a shipping rhythm product and design in commitments nobody walks back.

- 4th faster deployments

[03] quality & architecture

Quality is a default, not a phase

Module boundaries, review culture and automated testing on an enterprise POS in daily production use.

- 99.8→99.9% crash-free · 40% faster load

[04] delivery & predictability

I can still review any PR on any team

Drove the multi-year SwiftUI migration, and shipped a full ride-hailing platform solo across iOS, Android, backend and web.

- 4 platforms · 1 contract · 1 engineer

experience() — 8 roles

iOS Team Lead @ Marn — Jahez Group

Aug 2019 → Aug 2026 · Riyadh, KSA

- Led a 5+ engineer iOS team for seven years — onboarding, mentoring, career growth, and the review culture behind consistent 4× faster deployments and cycles.
- Owned the technical roadmap and architecture: an offline-first Coredata core with cloud sync, built as a venue keeps trading when the network does not.
- Set the engineering standards — module boundaries, code review, automated testing — holding the app at a 99.8→99.9% crash-free rate in production.
- Drove the multi-year migration to SwiftUI, Combine and async/await without pausing feature delivery — and setting the case for it to product leadership.
- Built CI/CD and the release process from scratch, cutting deployment time 40% and shortening every release cycle.
- Ran the performance programme (42% faster load times) and designed the table-management, order-routing and printing architecture of the product's core.
- Partnered with product, design and backend leadership on scope, estimates and delivery commitments.

Founding Platform Architect — iOS · Android · Backend — Web @ Ride-Hailing Platform · Independent

Mar 2024 → Present · CONTRACT · Remote

Took the **full technical scope of a founding CTO** and carried it alone — shipped a production ride-hailing platform **solo**: two native **iOS/Swift** apps (Rider & Driver) plus their Android counterparts, a hardened backend, and a real-time ops console — **owning every layer** and setting the engineering standards (idempotency, double-entry accounting, atomic module boundaries) it'd test with.

- **Backend APIs**
 `// NestJS · TypeScript · Mar '24 → now`
 Modular monolith, ~17 domains — **trip state machine, secured dispatch** over a Redis geo index, **double-entry ledger**, real-time rider/driver/admin **sockets**, JWT + phone-OTP, idempotency & audit log — **1,150+ tests**, Swagger docs.
- **Admin Console**
 `// Next.js 14 · Mar '24 → now`
 Bespoke **in-screen** ops surface — live **MapLibre** tracking map, dispatch/SOS live boards, KYC review, finance reconciliation, **role-based access**, **zone editor**. Google SSO.
- **iOS Apps — Rider & Driver**
 `// SwiftUI · Feb '24 → now`
 Two native **SwiftUI** apps — live GPS **trip lifecycle**, **realtime** sockets, in-app chat, payments, and driver earnings & turn-by-turn navigation.
- **Android Apps — Rider & Driver**
 `// Kotlin · Jetpack Compose · Sep '24 → now`
 Native **Kotlin / Compose** parity for both apps — same **realtime** trip, chat, and payments across **one shared API contract**.

One backend · one contract · four clients — plus growth loops (promotions, referrals, loyalty, wallet), driver safety/SOS, and scheduled reconciliation jobs. Shipped end-to-end.

Senior iOS Engineer @ HarvardTutor · voluntary charity project

Dec 2025 → Jun 2026

- Designed an architecture integrating **on-device machine learning** for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented real-time image processing with Metal shaders and Core Image effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart scanner blocking and optimized memory management throughout.

iOS Team Lead @ Ego — Ride Hailing

Mar 2018 → May 2019 · Riyadh, KSA

- Developed a ride-hailing ecosystem (iOS, watchOS) serving **150k+ users** in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimized route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Senior iOS Engineer @ HungerStation — Deliveryhero

Sep 2016 → Mar 2018 · Riyadh, KSA

- Contributed to a major food-delivery platform serving **20M+ users**.
- Optimized app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery simulation.
- Collaborated with backend teams on API design and integration.

iOS Developer @ AlNapedh

May 2016 → Aug 2016 · Riyadh, KSA

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spreedly payments and time-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

iOS & Apple Watch Developer @ Nile Design Co.

Jul 2015 → Sep 2015 · Cairo, Egypt

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted SwiftUI from WWDC 2019 *onward*.

iOS Developer @ GK Pro. Solutions Ltd.

May 2014 → May 2015 · Cairo, Egypt

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

projects[] — selected

[01] ai / private

HarvardTun — Privacy Browser

`SwiftUI` · `CoreML` · `WKWebView` · `CoreImage` · `Vision`

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. Metal shaders, smart blur, live video monitoring.

- AI-powered privacy browser

[02] full-stack

Ride-Hailing Platform

`SwiftUI` · `Kotlin` · `Jetpack Compose` · `NestJS` · `TypeScript` · `PostgreSQL` · `Redis` · `Socket.IO` · `Next.js`

End-to-end ride-hailing system built as **four native apps** (Rider & Driver on iOS + Android), a hardened NestJS backend (idempotency, double-entry ledger, 1,150+ tests), and a real-time Next.js ops console.

- Full-stack ownership · prod security

[03] delivery

HungerStation

`iOS16` · `Coredata` · `Real-time APIs` · `Perf`

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Performance and real-time order tracking.

- 4.9 / 5 — 1.9M+ ratings

[04] wearables

Ego — Ride Hailing

`MapKit` · `Core Location` · `Apple Pay` · `watchOS`

Complete ride-hailing ecosystem: rider, driver, and Apple Watch apps. Real-time GPS and cross-device experiences for 150k+ users.

- 4.7 / 5 — 211.8k+ ratings

[05] enterprise

Marn — iPad POS

`SwiftUI` · `CoreData` · `CloudKit` · `Real-time Sync`

Enterprise POS serving 20k+ restaurants across Saudi Arabia and Bahrain. First architecture, complex table management, real-time sync.

- 4.8 / 5 — 2,427 ratings

[06] community

Dalaelo

`Flask` · `Core Location` · `Social` · `ESRs`

Muslim community app — prayer times, mosque finder, and accessibility features with enhanced location + social integrations.

- 4.5 / 5 — 1,307 ratings

honours[]

01 Led an iOS engineering team for **7 consecutive years** on a POS platform serving **20k+ restaurants** and cafés.

02 Held a **99.8→99.9% crash-free** rate and cut deployment time **40%** with the standards, tests and CI/CD the team ran on.

03 Architected & **full-stack ride-hailing platform solo** — four native apps (iOS + Android), NestJS/PostgreSQL backends, and a Next.js ops console.

04 Built a food-delivery platform serving **20M+ users** and a ride-hailing ecosystem serving **150k+ users** in Saudi Arabia.

05 **10+ apps** on the App Store, used by millions across MENA.

06 **30+ projects** delivered across a 12-year career.

07 Early SwiftUI adopter (WWDC 2019) & early SwiftUI adopter (WWDC 2020).
