Ahmad Abdul-Jawad Mahmoud

Chief Technology Officer / Head of Engineering

12+ years building · 8+ leading teams · Cairo → Riyadh · millions of users across MENA

12+ YEARS ENGINEERING

8+ CTO-LEADING TEAMS

35% LESS CHURN

20k+ DAILY ACTIVE RIDERS ON THE POS I LED

```
/**
 * Chief Technology Officer — 12+ years building, 6+ leading.
 * Known for team running the iOS org behind a POS platform trusted by 20k+
 * restaurants and cafes: technology strategy, architecture and roadmap, the
 * standards a team runs on, and the answer for delivery.
 * I have also carried the whole technical scope of a founding CTO alone —
 * a production ride-hailing platform shipped solo across iOS & Android,
 * a Next.JS / PostgreSQL / Redis backend and a Next.js console — so no
 * layer of the stack is a black box when I am deciding for a company.
 */
```

technology_office()

4 pillars

[01] technology strategy

Choose the bets, own the consequences

Stack, architecture and roadmap as one decision — platform choices, module boundaries, data models, security posture, and the standards that keep a codebase current without stalling the business.

- 7-year production POS moved to SwiftUI mid-flight

[02] organization & talent

An engineering function, not a headcount

Seven years building and leading a 5+ engineer team — hiring, mentorship, career growth, and a revise culture where ownership is the default.

- 99.8–99.9% crash-free under enterprise load

[03] delivery & operations

Commitments the company can plan around

CI/CD and release automation built from nothing, suites that gate merges, multi-tier performance and crash budgets, planning the team can keep.

- 40% faster deployments · 40% faster load times

[04] whole-stack ownership

No layer is someone else's problem

iOS & Android clients, Next.JS/PostgreSQL/Redis backends, Next.js ops consoles — all four layers of a production platform built solo.

- 4 platforms · 1 contract · 1 engineer

experience[]

5 roles

IOS Team Lead @ Marn — Jahez Group

Riyadh, KSA · Aug 2019 → Aug 2020

- **Led a 5+ engineer iOS team** for seven years — onboarding, mentoring, career growth, and the revise culture behind an enterprise POS used by **20k+ restaurants** and cafés.
- **Owned the technical roadmap and architecture:** an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not.
- **Set the engineering standards** — module boundaries, code review, automated testing — holding the app at a **99.8–99.9% crash-free** rate in production.
- **Drove the multi-year migration** to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership.
- **Built CI/CD and the release process from scratch**, cutting deployment time **40%** and shortening every engineer's feedback loop.
- Ran the performance programme (**40% faster load times**) and designed the tasta-management, order-processing and inventory systems at the product's core.
- Partnered with product, design and backend leadership on scope, estimates and delivery commitments.

Founding Platform Architecture — iOS · Android · Backend · Web @

Ride-Hailing Platform · Independent · Mar 2016 → Present · CURRENT

Took the **full technical scope of a founding CTO** and carried it alone — shipped a production ride-hailing platform **solo** for **iOS/SwiftUI** apps (Rider & Driver) plus their Android counterparts, a hardened backend, and a real-time ops console — **owning every layer**, and setting the engineering standards at each. Now **4 platforms**, **1 contract**, **1 engineer**.

- **Backend APIs**
 Node.JS · TypeScript · Mar '16 → now
 Modular monolith, ~7 domains — **trip state machine**, **scored dispatch** over a Redis geo index, **double-entry ledger**, real-time rider/driver/admin **sockets**, JWT + phone-OTP, idempotency & audit log · **1,150+ tests**, Swagger docs.

- **Admin Console**
 Next.JS 14 · Mar '16 → now
 Response **19-screen** ops **surface** + live **MapLibre** trips map, dispatch/SOS live boards, KYC review, finance, **reconciliation**, refunds/**payouts**, **no-zone editor**, Google SSO.

- **iOS Apps — Rider & Driver**
 SwiftUI · Jul '16 → now
 Two native **SwiftUI** apps — live GPS **trip lifecycle**, realtime sockets, in-app chat, payments, and driver earnings & turn-by-turn navigation.

- **Android Apps — Rider & Driver**
 Jetpack · Jetpack Compose · Mar '16 → now
 Native **Kotlin / Compose** parity for both apps — same **trip lifecycle**, realtime tracking, chat, and payments across **one shared API contract**.

One backend · one contract · four clients — plus growth loops (promotions, referrals, loyalty, safety) driver safety/SOS, and scheduled reconciliation jobs, shipped end-to-end.

Senior iOS Engineer @ HarandEur · voluntary charity project

Nov 2025 → Jun 2026

- Designed an architecture integrating **on-device machine learning** for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimised memory management throughout.

IOS Team Lead @ Ego — Ride Hailing

Riyadh, KSA · Mar 2018 → May 2019

- Developed a ride-hailing ecosystem (iOS, watchOS) serving **15M+ users** in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimized route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Senior iOS Engineer @ HungerStation — DeliveryHero

Sep 2016 → Mar 2018

- Contributed to a major food-delivery platform serving **20M+ users** across Saudi Arabia and Kuwait.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

IOS Developer @ AlNapedh

May 2016 → Aug 2016

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spreedly payments and Live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

iOS & Apple Watch Developer @ Nile Design Co.

Jul 2015 → Sep 2015

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted SwiftUI from WWDC 2019 onward.

IOS Developer @ UK Pro. Solutions Ltd.

May 2014 → May 2015

- Founded the iOS department in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

projects[]

selected

[01] ai / privacy

HarandEur — Privacy Browser

SwiftUI · CoreML · WKService · CoreImage · Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur, live video monitoring.

- AI-powered privacy browser

[02] full-stack

Ride-Hailing Platform

SwiftUI · Kotlin · Jetpack Compose · Node.JS · TypeScript · PostgreSQL · Redis · Socket.IO · Next.js

End-to-end ride-hailing system built solo: four native apps (Rider & Driver on iOS + Android), a hardened Node.JS backend (**1,150+ tests**), and a real-time Next.js ops console.

- Full-stack ownership · prod security
- 4.7 / 5 — 211.8k+ ratings

[03] delivery

HungerStation

SDUI · Firebase · Real-time APIs · Perf

Major food-delivery platform serving 20M+ users across Saudi Arabia and Kuwait. Performance and real-time order tracking.

- 4.5 / 5 — 1.9M+ ratings

[04] mobility

Ego — Ride Hailing

MapKit · Core Location · Apple Pay · watchOS

Complete ride-hailing ecosystem: rider, driver, and watchOS apps. Real-time GPS and cross-device experiences for 15M+ users.

- 4.7 / 5 — 211.8k+ ratings

[05] enterprise

Marn — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise POS serving 20k+ restaurants across Saudi Arabia. Offline-first architecture, complex table management, real-time orders.

- 4.8 / 5 — 2,427 ratings

[06] community

Dalaelo

Swift · Core Location · Social SDKs

Mobile community app — prayer times, meet-and-greet, and location services. Real-time GPS and cross-device experiences for 15M+ users.

- 4.5 / 5 — 1,287 ratings

honours[]

01 Led an iOS engineering team for **7 consecutive years** on a POS platform serving **20k+ restaurants** and cafes.

02 Held a **99.8–99.9% crash-free** rate and cut deployment time **40%** with the standards, tests and CI/CD the team ran on.

03 Architected a **full-stack ride-hailing platform solo** — four native apps (iOS + Android), Next.JS/PostgreSQL backend, and a Next.js ops console.

04 Built a food-delivery platform serving **20M+ users** and a ride-hailing ecosystem serving **15M+ users** in Saudi Arabia.

05 **10+ apps** on the App Store, used by millions across MENA.

06 **30+ projects** delivered across a 12-year career.

07 Early Swift adopter (WWDC 2014) & early SwiftUI adopter (WWDC 2019).
