how_i_lead_technically()

4 pillars

2011 architecture & direction

Own the shape of the system

Module boundaries, data models, and the offline-first CordoVia core with iCloud sync, built so a venue keeps trading when the network does not.

- Offline-first — 7 years in production

2013 standards in code

The bar is a diff, not a document

Review culture, automated tests and CI/CD that gate merges, and a living engineering standard.

- 99.6–99.9% crash-free — 40% faster delivery

2015 mentoring at the bench

Lead by building alongside

Seven years mentoring a 5–8 engineer team through pairing, design review, and feedback that makes the next PR better.

- 5+ engineers · 7 years

2015 whole-stack depth

Credible at every layer

iOS & Android clients, Next15/PostgreSQL/Redis backends, Next.js consoles — all four layers of a production platform, built solo.

- 1,150+ tests · 4 platforms

experience()

8 roles

iOS Team Lead // Marn — Jabez Group

Riyadh, KSA — Aug 2019 → Aug 2026

- Led a 5+ engineer iOS team for seven years — onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafes.
- Owned the technical roadmap and architecture: an offline-first CordoVia core with iCloud sync, built so a venue keeps trading when the network does not.
- Set the engineering standards — module boundaries, code review, automated testing — holding the app at a 99.6–99.9% crash-free rate in production.
- Drove the multi-year migration to Swift5I, Combine and async/await without pausing feature delivery, and made the case for it to product leadership.
- Built CI/CD and the release process from scratch, cutting deployment time 60% and shortening every engineer's feedback loop.
- Ran the performance programme (42% faster load times) and designed the table-management, order-processing and inventory systems at the product's core.
- Partnered with product, design and backend leadership on scope, estimates and delivery commitments.

Founding Platform Architect — iOS · Android · Backend · Web // Ride-Hailing Platform — Independent

Riyadh, KSA — Mar 2026 → Present · current

Took the full technical scope of a founding CTO and carried it alone — shipped a production ride-hailing platform solo: two native (iOS/Swift5I apps (Rider & Driver) plus their Android counterparts, a hardened backend, and a real-time ops console — owning every layer and setting the engineering standards (idempotency, double-entry accounting, zero-trust boundaries, CI test suite).

- **Backend APIs** — Next15 · TypeScript · Per 20 → now
  MonoLiar monolith, ~17 domains — trip state machine, scored dispatch over a Redis geo index, double-entry ledger, Haversine ride-ETA/surcharge, socket.IO + phone-OTP, idempotency & audit log · 1,150+ tests, Swagger docs.
- **Admin Console** — Next.js 15 · Tailwind · Per 20 → now
  Bespoke in-house ops console — live MapLibre trips map, dispatch/SOS live board, KYC review, finance ledger & reconciliation, refunds/payouts, app zone editor, Google SSO.
- **iOS Apps — Rider & Driver** — SwiftUI · Jan 20 → now
  Two native SwiftUI apps — live GPS trip lifecycle, realtime sockets, in-app chat, payments, and driver earnings & turn-by-turn navigation.
- **Android Apps — Rider & Driver** — Kotlin · Jetpack Compose · Feb 20 → now
  Native Kotlin / Compose parity for both apps — same trip lifecycle, realtime tracking, chat, and payments across one shared API contract.

One backend · one contract · four clients — plus growth loops (promotions, referrals, loyalty, safety) driver safety/SOS, and scheduled reconciliation jobs, shipped end-to-end.

Senior iOS Engineer // HarvestBlur — voluntary charity project

Remote — Dec 2025 → Jun 2026

- Designed an architecture integrating on-device machine learning for automated content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimized memory management throughout.

iOS Team Lead // Ego — Ride Hailing

Riyadh, KSA — Mar 2018 → May 2019

- Developed a ride-hailing ecosystem (iOS, watchOS) serving 150k+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Senior iOS Engineer // HungerStation — DeliveryHero

Riyadh, KSA — Sep 2016 → Mar 2018

- Contributed to a major food-delivery platform serving 20M+ users.
- Optimized app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

iOS Developer // ALHapedh

Riyadh, KSA — May 2016 → Aug 2016

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spreedly payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

iOS & Apple Watch Developer // Nile Design Co.

Cairo, Egypt — Jul 2015 → Sep 2015

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted Swift5I from WWDC 2019 onward.

iOS Developer // UK Pro. Solutions Ltd.

Cairo, Egypt — May 2014 → May 2015

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

projects[]

selected

2011 iOS / Privacy

HarvestBlur — Privacy Browser

SwiftUI · CoreML · WKWebView · CoreImage · Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. Features on-device ML, smart blur, live video monitoring.

- AI-powered privacy browser

2015 Delivery

HungerStation

iOS15 · Firebase · Real-time APIs · Perf

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Performance and real-time order tracking.

- 4.5 / 5 — 1.99k ratings

2016 Delivery

Marn — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise POS serving 20k+ restaurants across Saudi Arabia. Offline-first architecture, complex table management, real-time orders.

- 4.8 / 5 — 2,427 ratings

2018 Ride-Hailing Platform

Ride-Hailing Platform

SwiftUI · Kotlin · Jetpack Compose · Next15 · TypeScript · PostgreSQL · Redis · Socket.IO · Next.js

End-to-end ride-hailing system built solo: four native apps (Rider & Driver on iOS + Android), a hardened Next15 backend (idempotency, double-entry ledger, 1,150+ tests), and a real-time Next.js ops console.

- Full-stack ownership · prod security

2019 Hackathon

Marn — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise POS serving 20k+ restaurants across Saudi Arabia. Offline-first architecture, complex table management, real-time orders.

- 4.8 / 5 — 2,427 ratings

2019 community

Qalaelo

MapKit · Core Location · Social SDKs

Muslim community app — prayer times, mosque finder, community features with enhanced location + social integration.

- 4.6 / 5 — 1,207 ratings

honours[]

01 — Led an iOS engineering team for 7 consecutive years on a POS platform serving 20k+ restaurants and cafes.

02 — Held a 99.8–99.9% crash-free rate and set deployment time 40% with the standards, tests and CI/CD the team ran on.

03 — Architected a full-stack ride-hailing platform solo — four native apps (iOS + Android), Next15/PostgreSQL backend, and a Next.js ops console.

04 — Built a food-delivery platform serving 20M+ users and a ride-hailing ecosystem serving 150k+ users in Saudi Arabia.

05 — 10+ apps on the App Store, used by millions across MENA.

06 — 10+ projects delivered across a 12-year career.

07 — Early SwiftUI adopter (WWDC 2014) & early SwiftData adopter (WWDC 2019).
