Ahmad Abdul-Jawad Mahmoud

Chief Technology Officer / Head of Engineering

12+ years building · 8+ leading teams · Cairo → Riyadh · millions of users across MENA

12+ YEARS ENGINEERING

8+ CTO-LEADING TEAMS

35M+ USERS REACHED

20k+ PEAK CONCURRENT ON THE POS I LED

```
/**
 * Chief Technology Officer — 12+ years building, 6+ leading.
 * Known for team-running: the iOS org behind a POS platform trusted by 200+
 * restaurants and cafés: technology strategy, voluntary chairing, and roadmap,
 * standards a team runs on, and the answer for delivery.
 * I have also carried the whole technical scope of a founding CTO alone —
 * a production ride-hailing platform shipped solo across iOS & Android,
 * a NestJS / PostgreSQL / Redis backend and a Next.js console — so no
 * layer of the stack is a black box when I am deciding for a company.
 */
```

technology_office()

4 pillars

[01] technology strategy

Choose the bets, own the consequences

Stack, architecture and roadmap as one decision — platform choices, module boundaries, data models, security posture, and build-vs-buy stances that a codebase survives without stalling the business.

- 7-year production POS moved to SwiftUI mid-flight

[02] delivery & operations

Commitments the company can plan around

CI/CD and release automation built from nothing, suites that gate merges, multisit performance and crash budgets, planning the team can keep.

- 40% faster deployments · 40% faster load times

[03] organization & talent

An engineering function, not a headcount

Seven years building and leading a 5+ engineer team: hiring, mentoring, career growth, and a revise culture where standards are raised, not diluted.

- 99.8–99.9% crash-free under enterprise load

[04] whole-stack ownership

No layer is someone else's problem

iOS & Android clients, NestJS/PostgreSQL/Redis backends, Next.js ops consoles — all four layers of a production platform built solo.

- 4 platforms · 1 contract · 1 engineer

experience()

5 roles

iOS Team Lead @ Marn — Jahez Group

Aug 2019 → Aug 2024 · Most Recent

Riyadh, KSA

- **Led a 5+ engineer iOS team** for seven years — onboarding, mentoring, career growth, and the revise culture behind an enterprise POS used by **20k+ restaurants** and cafés.
- **Owned the technical roadmap and architecture:** an offline-first CoreData core with cloud sync, built up over a season keeps trading when the network does not.
- **Set the engineering standards** — module boundaries, code review, automated testing — holding the app at a **99.8–99.9% crash-free** rate in production.
- **Drove the multi-year migration** to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership.
- **Built CI/CD and the release process from scratch**, cutting deployment time **40%** and shortening every engineer's feedback loop.
- Ran the performance programme (**40% faster load times**) and designed the tasta-management, order-processing and inventory systems at the product's core.
- Partnered with product, design and backend leadership on scope, estimates and delivery commitments.

Founding Platform Architect — iOS · Android · Backend · Web @ Ride-Hailing Platform · Independent

Dec 2025 → Jul 2026

Took the **full technical scope of a founding CTO** and carried it alone — shipped a production ride-hailing platform **solo** for **iOS/SwiftUI** apps (Rider & Driver) plus their Android counterparts, a hardened backend, and a real-time ops console — **owning every layer** and setting the engineering systems a future engineering team would inherit.

- **Backend APIs**
 Jul 2026 – Current · Dec '25 → Jul '26
 Modular monolith, ~7 domains · **trip state machine**, **scored dispatch** over a Redis geo index, **double-entry ledger**, **token-rotation/reuse-detection** sessions, JWT + phone-OTP, idempotency & audit log · **1,150+ tests**, Swagger docs.

- **iOS Apps · Rider & Driver**
 Jul 2026 – Current · Dec '25 → Jul '26
 Two native **SwiftUI** apps — live GPS **trip lifecycle**, realtime sockets, in-app chat, payments, and driver earnings & ops — built by hand.

- **Admin Console**
 Jul 2026 – Current · Feb '26 → Jul '26
 Express 19-screen ops surface — live **MapLibre** trips map, dispatch/SOS live boards, KYC review, finance reconciliation, refunds/payouts, **sub-zone editor**, Google SSO.

- **Android Apps · Rider & Driver**
 Jul 2026 – Current · Dec '25 → Jul '26
 Native **Kotlin / Compose** parity for both apps — same trip lifecycle, realtime tracking, chat, and payments across **one shared API contract**.

One backend · one contract · four clients — plus growth loops (promotions, referrals, loyalty, wallet), driver safety/QA, and scheduled reconciliation jobs, shipped end-to-end.

Senior iOS Engineer @ HarandLur · voluntary charity project

Sep 2025 → Dec 2025

- Designed an architecture integrating **on-device machine learning** for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimised memory management throughout.

iOS Team Lead @ Ego — Ride Hailing

Mar 2018 → May 2019

Riyadh, KSA

- Developed a ride-hailing ecosystem (iOS, watchOS) serving **150k+ users** in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Senior iOS Engineer @ HungerStation — DeliveryHero

Sep 2016 → Mar 2018

- Contributed to a major food-delivery platform serving **200+ users**.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

iOS Developer @ AlNapedh

May 2016 → Aug 2016

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spreedly payments and Live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

iOS & Apple Watch Developer @ Nile Design Co.

Jul 2015 → Sep 2015

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted SwiftUI from WWDC 2019 onward.

iOS Developer @ UK Pro. Solutions Ltd.

May 2014 → May 2015

- Founded the iOS department in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

projects[]

selected

[01] ai / private

HarandLur — Privacy Browser

SwiftUI · CoreML · WKService · CoreImage · Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur, live video monitoring.

- AI-powered privacy browser

[02] full-stack

Ride-Hailing Platform

SwiftUI · Kotlin · Jetpack Compose · NestJS · TypeScript · PostgreSQL · Redis · Socket.IO · Next.js

End-to-end ride-hailing system built solo: four native apps (Rider & Driver on iOS + Android), a hardened NestJS backend (idempotency, double-entry ledger, 1,150+ tests), and a real-time Next.js ops console.

- Full-stack ownership · prod security

[03] delivery

HungerStation

SDUI · Firebase · Real-time APIs · Perf

Major food-delivery platform serving 20M+ users across Saudi Arabia, Egypt & UAE. Performance and real-time order tracking.

- 4.5 / 5 — 1.9M+ ratings

[04] mobility

Ego — Ride Hailing

RideSS · Core Location · Google Maps · watchOS

Complete ride-hailing ecosystem: rider, driver, and watchOS apps. Real-time GPS and cross-device experiences for 150k+ users.

- 4.7 / 5 — 211.8k+ ratings

[05] enterprise

Marn — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise POS serving 20k+ restaurants across Saudi Arabia. Offline-first architecture, complex table management, real-time orders.

- 4.8 / 5 — 2,427 ratings

[06] community

Dalaelo

Swift · Core Location · Social SDKs

Muslim community app — prayer times, mosque finder, and community events. Real-time location + social integration.

- 4.5 / 5 — 1,287 ratings
