Technical lead with **12+ years** hands-on and **8+ leading** — the engineer a team's hardest problems land on. For seven years I owned the architecture of an enterprise POS used by **20k+ restaurants and cafés**; an offline-first CoreData core with cloud sync, the module boundaries, the review bar, and the multi-year SwiftUI migration that kept it modern without pausing delivery. I lead by building — most recently a production ride-hailing platform architected and shipped **solo** across native iOS & Android, a NestJS / PostgreSQL / Redis backend, and a Next.js operations console.

12+ YEARS HANDS-ON	8+ YEARS LEADING ENGINEERING TEAMS	35M+ USERS REACHED ACROSS SHIPPED APPS	30+ PROJECTS DELIVERED
--	--	--	--

01 — ARCHITECTURE & DIRECTION Own the shape of the system Module boundaries, data models, and the offline-first CoreData + cloud-sync core of an enterprise POS — built so a venue keeps trading when the network does not. Plus the migration plans that keep a codebase current without stalling delivery.	02 — STANDARDS IN CODE The bar is a diff, not a document Review culture, automated tests that gate merges, and CI/CD built from nothing (60% faster deployments). The standards I wrote and enforced held the app at a 99.8-99.9% crash-free rate in production.
03 — MENTORING AT THE KEYBOARD Lead by building alongside Seven years mentoring a 5+ engineer team through pairing, design review, and the kind of feedback that makes the next PR better. Technical direction lands faster when the lead is in the codebase too.	04 — WHOLE-STACK DEPTH Credible at every layer iOS & Android clients, NestJS/PostgreSQL/Redis backends, Next.js consoles — I built and ran all four layers of a production platform solo: trip state machine, scored dispatch over a Redis geo index, double-entry ledger, realtime sockets, 1,150+ tests.

§ 02

Professional Experience

Aug 2019 — Aug 2026 RIYADH, KSA	iOS Team Lead — 7 years leading the iOS org Marn — Jahez Group ↗ — Led a 5+ engineer iOS team for seven years — onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafés. — Owned the technical roadmap and architecture: an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not. — Set the engineering standards — module boundaries, code review, automated testing — that held the app at a 99.8-99.9% crash-free rate in production. — Drove the multi-year migration to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership. — Built CI/CD and the release process from scratch, cutting deployment time 60% and shortening every engineer's feedback loop. — Ran the performance programme (40% faster load times) and designed the table-management, order-processing and inventory systems at the heart of the product. — Partnered with product, design and backend leadership on scope, estimates and delivery commitments the team could keep.
Mar 2026 — Present CURRENT INDEPENDENT	Founding Platform Architect — iOS · Android · Backend · Web Ride-Hailing Platform · Independent Project Took the full technical scope of a founding CTO and carried it alone: chose the stack, set the standards, and shipped a production ride-hailing platform — two native iOS/SwiftUI apps (Rider & Driver) plus their Android counterparts, a hardened backend, and a real-time ops console. Every layer from data model to release, governed by explicit rules: idempotent mutations, double-entry accounting, acyclic module boundaries, and a CI test suite that gates the merge. Backend APIs NestJS · TypeScript · Mar '26 → now Modular monolith, ~17 domains — trip state machine, scored dispatch over a Redis geo index, double-entry ledger, realtime rider/driver/admin sockets, JWT + phone-OTP, idempotency & audit log · 1,150+ tests, Swagger docs. Admin Console Next.js 14 · Jun '26 → now Bespoke 19-screen ops surface — live MapLibre trips map, dispatch/SOS live boards, KYC review, finance reconciliation, refunds/payouts, map zone editor, Google SSO. iOS Apps · Rider & Driver SwiftUI · Jul '26 → now Two native SwiftUI apps — live GPS trip lifecycle, realtime sockets, in-app chat, payments, and driver earnings & turn-by-turn navigation. Android Apps · Rider & Driver Kotlin · Jetpack Compose · Sep '26 → now Native Kotlin / Compose parity for both apps — same trip lifecycle, realtime tracking, chat, and payments across one shared API contract. One backend · one contract · four clients — plus growth loops (promotions, referrals, loyalty tiers, wallet), driver safety/SOS, and scheduled reconciliation jobs. The exercise a technical leader needs periodically: own every trade-off yourself, then know exactly what you are asking of a team.

Mar 2018 – May 2019 RIYADH, KSA	iOS Team Lead Ego – The Ride Hailing App ↗ – Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 15M+ users in Saudi Arabia. – Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms. – Integrated Apple Pay, HyperPay, and push-notification infrastructure. – Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking. – Built the driver rating system and real-time fare calculation engine.
Sep 2016 – Mar 2018 KSA	Senior iOS Engineer HungerStation – DeliveryHero Group ↗ – Contributed to a major food-delivery platform serving 20M+ users. – Optimised app performance for high-volume transaction processing. – Implemented real-time order tracking and delivery optimisation. – Collaborated with backend teams on API design and integration.
May 2016 – Aug 2016	iOS Developer ALNapedh ↗ – Developed food-ordering apps with Firebase integration and real-time features. – Implemented Speedly payments and live-chat functionality. – Built responsive UI with Auto Layout across multiple device sizes.
Jul 2015 – Sep 2015	iOS & Apple Watch Developer Nile Design Co. ↗ – Early adopter of Apple Watch development (watchOS 1-2). – Built a foundation in iOS and watchOS app development. – Adopted SwiftUI from WWDC 2019 onward.
May 2014 – May 2015	iOS Developer UK Pro. Solutions Ltd. ↗ – Foundation iOS experience in Objective-C and early Swift. – Built social networks and e-commerce platforms. – Learned core iOS principles and App Store deployment.

Selected Projects

01 — FULL-STACK Ride-Hailing Platform (built from scratch · since Mar 2026) SwiftUI · Kotlin · Jetpack Compose · NestJS · TypeScript · PostgreSQL · Redis · Socket.IO · Next.js End-to-end ride-hailing platform architected solo: four native apps (Rider & Driver on iOS/SwiftUI and Android/Kotlin-Compose), a hardened NestJS backend (trip state machine, scored dispatch, double-entry ledger, realtime sockets, 1,150+ tests), and a real-time Next.js operations console. ♦ Four Platforms · Solo Ownership · Production Security	02 — ENTERPRISE Marn — iPad POS SwiftUI · CoreData · CloudKit · Real-time Sync Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, complex table management, real-time order processing — the product my iOS team owned for seven years. ★ 4.8 / 5 — 2,437 ratings
03 — MOBILITY Ego — Ride Hailing MapKit · Core Location · Apple Pay · Push · watchOS Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for 15M+ users. ★ 4.7 / 5 — 211.8k+ ratings	04 — DELIVERY HungerStation UIKit · Firebase · Real-time APIs · Perf Optimization Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Focused on performance and real-time order tracking. ★ 4.5 / 5 — 1.9M+ ratings
05 — AI / PRIVACY HaramBlur — Privacy Browser SwiftUI · CoreML · WKWebView · CoreImage · Vision Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur effects, and live video monitoring. ♦ AI-Powered Privacy Browser	06 — COMMUNITY Daleelo MapKit · Core Location · Social SDKs · Community Muslim community app for users across the US — prayer times, mosque finder, and community features with enhanced location and social integration. ★ 4.5 / 5 — 1,287 ratings

§ 07

Honours

01	Led an iOS engineering team for 7 consecutive years on a POS platform serving 20k+ restaurants and cafés — through the product's growth from launch scale to enterprise.
02	Held a 99.8-99.9% crash-free rate and cut deployment time 60% by building the standards, tests and CI/CD the team ran on.
03	Architected a full-stack ride-hailing platform solo — four native apps (iOS + Android), a NestJS/PostgreSQL backend, and a Next.js ops console, with idempotent APIs and double-entry accounting.
04	Built a food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving 15M+ users in Saudi Arabia.
05	10+ apps published on the App Store, used by millions across MENA.
06	30+ projects delivered across a 12-year career.
07	Early Swift adopter (WWDC 2014) and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.
