YEARS LEADING TEAMS

7yrs

LEADING THE SAME TEAM

20k+

BUSINESSES ON THE POS I LED

/\*\*  
\* Engineering Lead – 12+ years building, 8+ leading, including seven  
\* consecutive years running the same 5+ engineer iOS team through a  
\* product's growth into an enterprise POS serving 20k+ restaurants.  
\* I grow engineers, protect the quality bar, and make delivery predictable:  
\* onboarding, mentoring, review culture, CI/CD, and honest estimates with  
\* product and design.  
\* Still technical throughout: I architect, I review, and I am now building  
\* a full ride-hailing platform solo across iOS, Android, backend and web.  
\*/  
  
## how\_i\_run\_a\_team() ----- 4 pillars  
  
[01] people & growth  
**Grow engineers, not just features**  
Seven years with one team – onboarding, mentoring, career conversations, and pairing on the problems that actually teach.  
  
◆ Retention through a seven-year product  
  
[02] delivery & predictability  
**Estimates the team can keep**  
CI/CD built from nothing, suites that gate merges, and planning with product and design in commitments nobody walks back.  
  
◆ 60% faster deployments  
  
[03] quality & standards  
**Quality is a default, not a phase**  
Module boundaries, review culture and automated testing on an enterprise POS in daily production use.  
  
◆ 99.8-99.9% crash-free • 40% faster load  
  
[04] technical credibility  
**I can still review any PR on my team**  
Drove the multi-year SwiftUI migration, and building a full ride-hailing platform solo across iOS, Android, backend and web.  
  
◆ 4 platforms • 1 contract • 1 engineer

## experience() ----- 8 roles  
  
iOS Team Lead @ Marn – Jahez Group   Aug 2019 → Aug 2026  
RIYADH, KSA  
  
+ Led a 5+ engineer iOS team for seven years – onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafés.  
  
+ Owned the technical roadmap and architecture: an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not.  
  
+ Set the engineering standards – module boundaries, code review, automated testing – holding the app at a 99.8-99.9% crash-free rate in production.  
  
+ Drove the multi-year migration to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership.  
  
+ Built CI/CD and the release process from scratch, cutting deployment time 60% and shortening every engineer's feedback loop.  
  
+ Ran the performance programme (40% faster load times) and designed the table-management, order-processing and inventory systems at the product's core.  
  
+ Partnered with product, design and backend leadership on scope, estimates and delivery commitments.  
  
Founding Platform Architect – iOS • Android • Backend • Web @  
Ride-Hailing Platform • Independent   Mar 2026 → Present   CURRENT  
Took the full technical scope of a founding CTO and carried it alone – building a production ride-hailing platform solo: a hardened backend and a real-time ops console in production, with two native iOS/SwiftUI apps (Rider & Driver) and the Android driver app in active development – owning every layer and setting the engineering standards (idempotency, double-entry accounting, acyclic module boundaries, CI test suite).  
  
> Backend APIs  
// NestJS • TypeScript • Mar '26 → now  
Modular monolith, 22 domains – trip state machine, scored dispatch over a Redis geo index, double-entry ledger, realtime rider/driver/admin sockets, JWT + phone-OTP, idempotency & audit log • ~300 endpoints over 47 controllers, 2,800+ tests, Swagger docs.  
  
> Admin Console  
// Next.js 14 • Jun '26 → now  
Bespoke 30-screen ops surface – live MapLibre trips map, dispatch/SOS live boards, KYC onboarding review, finance reconciliation, refunds/payouts, cash control, map zone editor, feature flags, audit log, Google SS0.  
  
> iOS Apps • Rider & Driver  
// SwiftUI • Jul '26 → now  
Two native SwiftUI apps on a shared BuraqCore Swift package (domain • networking • design system, pinned remotely) – live GPS trip lifecycle, Socket.IO feeds with fresh-token reconnect, in-app chat, payments, Live Activities, driver earnings & turn-by-turn navigation • ~150 SwiftUI views, 430+ tests.  
  
> Android App • Driver  
// Kotlin • Jetpack Compose • Sep '26 → now  
Native Kotlin / Compose port of the driver app against the same API contract – modularised (core • networking • design system • domain) with the design-system and CI bar in place; product features porting now.  
  
One backend • one contract • three clients in flight – plus growth loops (promotions, referrals, loyalty, wallet), driver safety/SOS, and scheduled reconciliation jobs, owned end-to-end.  
  
Senior iOS Engineer @ HaramBlur • voluntary charity project   Dec 2025 → Jun 2026  
  
+ Designed an architecture integrating on-device machine learning for real-time content analysis.  
  
+ Built a seamless communication layer between native iOS and web-based content.  
  
+ Implemented efficient image processing with region-based and full-image blur effects.  
  
+ Created a real-time video monitoring system for continuous content filtering.  
  
+ Developed smart banner blocking and optimised memory management throughout.  
  
iOS Team Lead @ Ego – Ride Hailing   Mar 2018 → May 2019  
RIYADH, KSA  
  
+ Developed a ride-hailing ecosystem (iOS, watchOS) serving 15M+ users in Saudi Arabia.  
  
+ Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.  
  
+ Integrated Apple Pay, HyperPay, and push-notification infrastructure.  
  
+ Created seamless iPhone — Apple Watch handoff for continuous ride tracking.  
  
+ Built the driver rating system and real-time fare calculation engine.  
  
Senior iOS Engineer @ HungerStation – DeliveryHero   Sep 2016 → Mar 2018  
KSA  
  
+ Contributed to a major food-delivery platform serving 20M+ users.  
  
+ Optimised app performance for high-volume transaction processing.  
  
+ Implemented real-time order tracking and delivery optimisation.  
  
+ Collaborated with backend teams on API design and integration.  
  
iOS Developer @ ALNapedh   May 2016 → Aug 2016  
  
+ Developed food-ordering apps with Firebase integration and real-time features.  
  
+ Implemented Speedly payments and live-chat functionality.  
  
+ Built responsive UI with Auto Layout across multiple device sizes.  
  
iOS & Apple Watch Developer @ Nile Design Co.   Jul 2015 → Sep 2015  
  
+ Early adopter of Apple Watch development (watchOS 1-2).  
  
+ Built a foundation in iOS and watchOS app development.  
  
+ Adopted SwiftUI from WWDC 2019 onward.  
  
iOS Developer @ UK Pro. Solutions Ltd.   May 2014 → May 2015  
  
+ Foundation iOS experience in Objective-C and early Swift.  
  
+ Built social networks and e-commerce platforms.  
  
+ Learned core iOS principles and App Store deployment.  
  
## projects[] ----- selected  
  
[01] ai / privacy  
**HaramBlur – Privacy Browser**  
SwiftUI • CoreML • WKWebView • CoreImage • Vision  
Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur, live video monitoring.  
  
◆ AI-powered privacy browser  
  
[02] full-stack  
**Ride-Hailing Platform**  
SwiftUI • Kotlin • Jetpack Compose • NestJS • TypeScript • PostgreSQL • Redis • Socket.IO • Next.js  
End-to-end ride-hailing system built solo: a hardened NestJS backend (idempotency, double-entry ledger, 2,800+ tests) and a real-time Next.js ops console in production, with three native clients (Rider & Driver on iOS, Driver on Android) in active development.  
  
◆ Full-stack ownership • prod security  
  
[03] delivery  
**HungerStation**  
UIKit • Firebase • Real-time APIs • Perf  
Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Performance and real-time order tracking.  
  
★ 4.5 / 5 – 1.9M+ ratings  
  
[04] mobility  
**Ego – Ride Hailing**  
MapKit • Core Location • Apple Pay • watchOS  
Complete ride-hailing ecosystem: rider, driver, and Apple Watch apps. Real-time GPS and cross-device experiences for 15M+ users.  
  
★ 4.7 / 5 – 211.8k+ ratings  
  
[05] enterprise  
**Marn – iPad POS**  
SwiftUI • CoreData • CloudKit • Real-time Sync  
Enterprise POS serving 20k+ restaurants across Saudi Arabia. Offline-first architecture, complex table management, real-time orders.  
  
★ 4.8 / 5 – 2,437 ratings  
  
[06] community  
**Daleelo**  
MapKit • Core Location • Social SDKs  
Muslim community app – prayer times, mosque finder, and community features with enhanced location + social integration.  
  
★ 4.5 / 5 – 1,287 ratings
