Engineering leader with **12+ years** building and **8+ leading** — including **seven consecutive years** running the same **5+ engineer iOS team** through a product's growth from launch scale to an enterprise POS serving 20k+ restaurants and cafés. I grow engineers, protect the quality bar, and make delivery predictable: onboarding, mentoring, review culture, CI/CD, and honest estimates with product and design. I stayed technical the whole time — I still architect, still review, and I am now building a full ride-hailing platform solo across iOS, Android, backend and web.

12+ YEARS IN ENGINEERING	8+ YEARS LEADING ENGINEERING TEAMS	7yrs LEADING THE SAME iOS TEAM	20k+ BUSINESSES SERVED BY THE POS I LED
--	--	--	---

§ 01

How I Run a Team

01 — PEOPLE & GROWTH Grow engineers, not just features Seven years with one team: onboarding that gets a new engineer productive fast, mentoring and career conversations, and pairing on the problems that teach. Retention through a seven-year product is the result I am proudest of — the same people got better, together.	02 — DELIVERY & PREDICTABILITY Estimates the team can keep CI/CD and release automation built from nothing (60% faster deployments), suites that gate merges, and planning with product and design in commitments nobody is to walk back. Scope conversations happen before the sprint, not during it.
--	--

03 — QUALITY & STANDARDS Quality is a default, not a phase Module boundaries, review culture, and automated testing that held an enterprise POS at a 99.8-99.9% crash-free rate in production — plus a performance programme that made the app 40% faster to load.	04 — TECHNICAL CREDIBILITY I can still review any PR on my team I lead technically as well as organisationally: I drove the multi-year SwiftUI/Combine/async-await migration, and I I am architecting and building a production ride-hailing platform solo across iOS, Android, a NestJS backend and a Next.js console.
---	---

§ 02

Professional Experience

Aug 2019 — Aug 2026 RIYADH, KSA	iOS Team Lead — 7 years leading the iOS org Marn — Jahez Group Led a 5+ engineer iOS team for seven years — onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafés. Owned the technical roadmap and architecture: an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not. Set the engineering standards — module boundaries, code review, automated testing — that held the app at a 99.8-99.9% crash-free rate in production. Proved the multi-year migration to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership. Built CI/CD and the release process from scratch, cutting deployment time 60% and shortening every engineer's feedback loop. Ran the performance programme (40% faster load times) and designed the table-management, order-processing and inventory systems at the heart of the product. Partnered with product, design and backend leadership on scope, estimates and delivery commitments the team could keep.
Mar 2026 — Present CURRENT INDEPENDENT	Founding Platform Architect — iOS · Android · Backend · Web Ride-Hailing Platform · Independent Project Took the full technical scope of a founding CTO and carried it alone: chose the stack, set the standards, and have been building a production ride-hailing platform — a hardened backend and a real-time ops console in production, with two native iOS/SwiftUI apps (Rider & Driver) and the Android driver app in active development. Every layer from data model to release, governed by explicit rules: idempotent mutations, double-entry accounting, acyclic module boundaries, and a CI test suite that gates the merge. Backend APIs NextJS · TypeScript · Mar '26 → now Modular monolith, 22 domains — trip state machine, scored dispatch over a Redis geo index, double-entry ledger, realtime rider/driver/admin sockets, JWT + phone-OTP, idempotency & audit log · ~300 endpoints over 47 controllers, 2,800+ tests, Swagger docs. Admin Console Next.js 14 · Jun '26 → now Bespoke 30-screen ops surface — live MapLibre trips map, dispatch/SOS live boards, KYC onboarding review, finance reconciliation, refunds/payouts, cash control, map zone editor, feature flags, audit log, Google SSO. iOS Apps · Rider & Driver SwiftUI · Jul '26 → now Two native SwiftUI apps on a shared BuraqCore Swift package (domain · networking · design system, pinned remotely) — live GPS trip lifecycle, Socket.IO feeds with fresh-token reconnect, in-app chat, payments, Live Activities, driver earnings & turn-by-turn navigation · ~150 SwiftUI views, 430+ tests. Android App · Driver Kotlin · Jetpack Compose · Sep '26 → now Native Kotlin / Compose port of the driver app against the same API contract — modularised (core · networking · design system · domain) with the design-system and CI bar in place; product features porting now. One backend · one contract · three clients in flight — plus growth loops (promotions, referrals, loyalty tiers, wallet), driver safety/SOS, and scheduled reconciliation jobs. The exercise a technical leader needs periodically: own every trade-off yourself, then know exactly what you are asking of a team.

Dec 2025 — Jun 2026 VOLUNTEER	Senior iOS Engineer HaramBlur — Voluntary Charity Project Designed an architecture integrating on-device machine learning for real-time content analysis. Built a seamless communication layer between native iOS and web-based content. Implemented efficient image processing with region-based and full-image blur effects. Created a real-time video monitoring system for continuous content filtering. Developed smart banner blocking and optimised memory management throughout.
Mar 2018 — May 2019 RIYADH, KSA	iOS Team Lead Ego — The Ride Hailing App Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 15M+ users in Saudi Arabia. Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms. Integrated Apple Pay, HyperPay, and push-notification infrastructure. Created seamless iPhone — Apple Watch handoff for continuous ride tracking. Built the driver rating system and real-time fare calculation engine.
Sep 2016 — Mar 2018 KSA	Senior iOS Engineer HungerStation — DeliveryHero Group Contributed to a major food-delivery platform serving 20M+ users. Optimised app performance for high-volume transaction processing. Implemented real-time order tracking and delivery optimisation. Collaborated with backend teams on API design and integration.

May 2016 — Aug 2016	iOS Developer ALNapedh Developed food-ordering apps with Firebase integration and real-time features. Implemented Speedrely payments and live-chat functionality. Built responsive UI with Auto Layout across multiple device sizes.
--------------------------------	--

Jul 2015 — Sep 2015	iOS & Apple Watch Developer Nile Design Co. Early adopter of Apple Watch development (watchOS 1-2). Built a foundation in iOS and watchOS app development. Adopted SwiftUI from WWDC 2019 onward.
--------------------------------	---

May 2014 — May 2015	iOS Developer UK Pro. Solutions Ltd. Foundation iOS experience in Objective-C and early Swift. Built social networks and e-commerce platforms. Learned core iOS principles and App Store deployment.
--------------------------------	--

Selected Projects

01 — FULL-STACK Ride-Hailing Platform (built from scratch · since Mar 2026) SwiftUI · Kotlin · Jetpack Compose · NestJS · TypeScript · PostgreSQL · Redis · Socket.IO · Next.js End-to-end ride-hailing platform architected solo: a hardened NestJS backend (trip state machine, scored dispatch, double-entry ledger, realtime sockets, 2,800+ tests) and a real-time Next.js operations console in production, with three native clients (Rider & Driver on iOS/SwiftUI, Driver on Android/Kotlin-Compose) in active development. Four Platforms · Solo Ownership · Production Security	02 — ENTERPRISE Marn — iPad POS SwiftUI · CoreData · CloudKit · Real-time Sync Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, complex table management, real-time order processing — the product my iOS team owned for seven years. ★ 4.8 / 5 — 2,437 ratings
03 — MOBILITY Ego — Ride Hailing MapKit · Core Location · Apple Pay · Push · watchOS Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for 15M+ users. ★ 4.7 / 5 — 211.8k+ ratings	04 — DELIVERY HungerStation UIKit · Firebase · Real-time APIs · Perf Optimization Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving 15M+ users in Saudi Arabia. ★ 4.5 / 5 — 1.9M+ ratings
05 — AI / PRIVACY HaramBlur — Privacy Browser SwiftUI · CoreML · WKWebView · CoreImage · Vision Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur effects, and live video monitoring. ★ AI-Powered Privacy Browser	06 — COMMUNITY Daleelo MapKit · Core Location · Social SDKs · Community Muslim community app for users across the US — prayer times, mosque finder, and community features with enhanced location and social integration. ★ 4.5 / 5 — 1,287 ratings

§ 07

Honours

01	Led an iOS engineering team for 7 consecutive years on a POS platform serving 20k+ restaurants and cafés — through the product's growth from launch scale to enterprise.
02	Held a 99.8-99.9% crash-free rate and cut deployment time 60% by building the standards, tests and CI/CD the team ran on.
03	Architecting a full-stack ride-hailing platform solo — NestJS/PostgreSQL backend and Next.js ops console in production, three native clients (two iOS, one Android) in development, with idempotent APIs and double-entry accounting.
04	Built a food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving 15M+ users in Saudi Arabia.
05	10+ apps published on the App Store, used by millions across MENA.
06	30+ projects delivered across a 12-year career.
07	Early Swift adopter (WWDC 2014) and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.
