Ahmad Abdul-Jawad Mahmoud

Founding Engineer / Founding CTO / Technical Lead

// 12+ years building • 8+ leading teams • Cairo — Riyadh • millions of users across MENA

./AHMAD.V1EST-2014

12+YEARS ENGINEERING

4LAYERS OWNED SOLO

2,800+TESTS I WROTE

20k+BUSINESSES ON THE POS I LED

/**
* Founding engineer – I build the first version myself.
* Right now: a production ride-hailing platform, solo, across four layers.
* NestJS / PostgreSQL / Redis backend and a Next.js ops console already in
* production; native iOS & Android clients in active development.
* Empty repo to running system – data model, dispatch, ledger, sockets, CI.
* Before that: 12+ years in iOS, seven of them leading the 5+ engineer team
* behind a POS platform used by 20k+ restaurants. So I know what it costs to
* hand a codebase to other engineers, and I build for that from day one.
*/

zero_to_one() ----- 4 pillars

[01] ship from nothing

Empty repo to running system

The first version end to end – data model, API contract, auth, deploy, Trip state machine, scored dispatch, double-entry ledger, realtime sockets.

◆ 2,800+ tests before a second engineer

[02] stack decisions

Choose the bets, own the consequences

Nobody to escalate to when you are the whole team. I pick the stack, set module boundaries and security posture, and live with it.

◆ 7-year production POS moved to SwiftUI mid-flight

[03] standards before scale

Build it so a team can take it over

Idempotent mutations, acyclic boundaries, a CI suite that gates the merge, Swagger docs – written while still the only engineer.

◆ the difference between a prototype and something you can hire into

[04] then lead the team

I have done the other half too

Seven years leading a 5+ engineer iOS team – onboarding, mentoring, review culture, CI/CD.

◆ 99.8-99.9% crash-free in production

experience() ----- 8 roles

Founding Platform Architect – iOS • Android • Backend • Web @ Ride-Hailing Platform • Independent

Mar 2026 → PresentCURRENT

Took the full technical scope of a founding CTO and carried it alone – building a production ride-hailing platform solo: a hardened backend and a real-time ops console in production, with two native iOS/SwiftUI apps (Rider & Driver) and the Android driver app in active development – owning every layer and setting the engineering standards (idempotency, double-entry accounting, acyclic module boundaries, CI test suite).

> Backend APIs

// NestJS • TypeScript • Mar '26 → now

Modular monolith, 22 domains – trip state machine, scored dispatch over a Redis geo index, double-entry ledger, realtime rider/driver/admin sockets, JWT + phone-OTP, idempotency & audit log • ~300 endpoints over 47 controllers, 2,800+ tests, Swagger docs.

> Admin Console

// Next.js 14 • Jun '26 → now

Bespoke 30-screen ops surface – live MapLibre trips map, dispatch/SOS live boards, KYC onboarding review, finance reconciliation, refunds/payouts, cash control, map zone editor, feature flags, audit log, Google SS0.

> iOS Apps • Rider & Driver

// SwiftUI • Jul '26 → now

Two native SwiftUI apps on a shared BuraqCore Swift package (domain • networking • design system, pinned remotely) – Live GPS trip lifecycle, Socket.IO feeds with fresh-token reconnect, in-app chat, payments, Live Activities, driver earnings & turn-by-turn navigation • ~150 SwiftUI views, 430+ tests.

> Android App • Driver

// Kotlin • Jetpack Compose • Sep '26 → now

Native Kotlin / Compose port of the driver app against the same API contract – modularised (core • networking • design system • domain) with the design-system and CI bar in place; product features porting now.

One backend • one contract • three clients in flight – plus growth loops (promotions, referrals, loyalty, wallet), driver safety/SOS, and scheduled reconciliation jobs, owned end-to-end.

iOS Team Lead @ Marn – Jahez Group

Aug 2019 → Aug 2026

RIYADH, KSA

◆ Led a 5+ engineer iOS team for seven years – onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafés.

◆ Owned the technical roadmap and architecture: an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not.

◆ Set the engineering standards – module boundaries, code review, automated testing – holding the app at a 99.8-99.9% crash-free rate in production.

◆ Drove the multi-year migration to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership.

◆ Built CI/CD and the release process from scratch, cutting deployment time 60% and shortening every engineer's feedback loop.

◆ Ran the performance programme (40% faster load times) and designed the table-management, order-processing and inventory systems at the product's core.

◆ Partnered with product, design and backend leadership on scope, estimates and delivery commitments.

Senior iOS Engineer @ HaramBlur • voluntary charity project

Dec 2025 → Jun 2026

◆ Designed an architecture integrating on-device machine learning for real-time content analysis.

◆ Built a seamless communication layer between native iOS and web-based content.

◆ Implemented efficient image processing with region-based and full-image blur effects.

◆ Developed a real-time video monitoring system for continuous content filtering.

◆ Developed smart banner blocking and optimised memory management throughout.

iOS Team Lead @ Ego – Ride Hailing

Mar 2018 → May 2019

RIYADH, KSA

◆ Developed a ride-hailing ecosystem (iOS, watchOS) serving 15M+ users in Saudi Arabia.

◆ Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.

◆ Integrated Apple Pay, HyperPay, and push-notification infrastructure.

◆ Created seamless iPhone → Apple Watch handoff for continuous ride tracking.

◆ Built the driver rating system and real-time fare calculation engine.

Senior iOS Engineer @ HungerStation – DeliveryHero

Sep 2016 → Mar 2018

KSA

◆ Contributed to a major food-delivery platform serving 20M+ users.

◆ Optimised app performance for high-volume transaction processing.

◆ Implemented real-time order tracking and delivery optimisation.

◆ Collaborated with backend teams on API design and integration.

iOS Developer @ ALNapedh

May 2016 → Aug 2016

◆ Developed food-ordering apps with Firebase integration and real-time features.

◆ Implemented Speedly payments and live-chat functionality.

◆ Built responsive UI with Auto Layout across multiple device sizes.

iOS & Apple Watch Developer @ Nile Design Co.

Jul 2015 → Sep 2015

◆ Early adopter of Apple Watch development (watchOS 1-2).

◆ Built a foundation in iOS and watchOS app development.

◆ Adopted SwiftUI from WWDC 2019 onward.

iOS Developer @ UK Pro. Solutions Ltd.

May 2014 → May 2015

◆ Foundation iOS experience in Objective-C and early Swift.

◆ Built social networks and e-commerce platforms.

◆ Learned core iOS principles and App Store deployment.

projects[] ----- selected

[01] ai / privacy

HaramBlur – Privacy Browser

SwiftUI • CoreML • WKWebView • CoreImage • Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur, live video monitoring.

◆ AI-powered privacy browser

[02] full-stack

Ride-Hailing Platform

SwiftUI • Kotlin • Jetpack Compose • NestJS • TypeScript • PostgreSQL • Redis • Socket.IO • Next.js

End-to-end ride-hailing system built solo: a hardened NestJS backend (idempotency, double-entry ledger, 2,800+ tests) and a real-time Next.js ops console in production, with three native clients (Rider & Driver on iOS, Driver on Android) in active development.

◆ Full-stack ownership • prod security

[03] delivery

HungerStation

UIKit • Firebase • Real-time APIs • Perf

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Performance and real-time order tracking.

◆ 4.5 / 5 – 1.9M+ ratings

[04] mobility

Ego – Ride Hailing

MapKit • Core Location • Apple Pay • watchOS

Complete ride-hailing ecosystem: rider, driver, and Apple Watch apps. Real-time GPS and cross-device experiences for 15M+ users.

◆ 4.7 / 5 – 211.8k+ ratings

[05] enterprise

Marn – iPad POS

SwiftUI • CoreData • CloudKit • Real-time Sync

Enterprise 18k+ restaurants across Saudi Arabia. Offline-first architecture, complex table management, real-time orders.

◆ 4.8 / 5 – 2,437 ratings

[06] community

DaLeelo

MapKit • Core Location • Social SDKs

Muslim community app – prayer times, mosque finder, and community features with enhanced location + social integration.

◆ 4.5 / 5 – 1,287 ratings

honours[] -----

01Led an iOS engineering team for 7 consecutive years on a POS platform serving 20k+ restaurants and cafés.

02Held a 99.8-99.9% crash-free rate and cut deployment time 60% with the standards, tests and CI/CD the team ran on.

03Architecting a full-stack ride-hailing platform solo – NestJS/PostgreSQL backend and Next.js ops console in production, three native clients (two iOS, one Android) in development.

04Built a food-delivery platform serving 20M+ users and a ride-hailing ecosystem serving 15M+ users in Saudi Arabia.

0510+ apps on the App Store, used by millions across MENA.

0630+ projects delivered across a 12-year career.

072014 Swift developer (WWDC 2014) & early SwiftUI adopter (WWDC 2019).
