Senior **iOS Tech Lead** with **12+ years** leading mobile teams and architecting scalable iOS applications. Expert in modern SwiftUI, team leadership, and shipping high-performance apps used by **millions across the MENA region** — with proven range to architect full-stack systems end-to-end, including a production-grade ride-hailing platform built from scratch spanning native iOS & Android clients and a hardened NestJS / PostgreSQL backend.

## § 06 Honours

|    |                                                                                                                                                                                                          |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 01 | Built a food-delivery platform serving <b>20M+ users</b> across Saudi Arabia and Bahrain.                                                                                                                |
| 02 | Built a ride-hailing ecosystem serving <b>15M+ users</b> in Saudi Arabia.                                                                                                                                |
| 03 | Architected a <b>full-stack ride-hailing platform solo</b> — four native apps (iOS + Android), a NestJS/PostgreSQL backend, and a Next.js ops console, with idempotent APIs and double-entry accounting. |
| 04 | Led a POS system serving <b>20k+ restaurants</b> and cafés.                                                                                                                                              |
| 05 | <b>10+ apps</b> published on the App Store, used by millions across MENA.                                                                                                                                |
| 06 | <b>30+ iOS projects</b> delivered across a 12-year career.                                                                                                                                               |
| 07 | Early Swift adopter (WWDC 2014) and early SwiftUI adopter (WWDC 2019).                                                                                                                                   |
