• SEE THE LIVE INTERACTIVE EDITION ↗

Senior **iOS Tech Lead** with **12+ years** leading mobile teams and architecting scalable iOS applications. Expert in modern SwiftUI, team leadership, and shipping high-performance apps used by **millions across the MENA region** — with proven range to architect full-stack systems end-to-end, including a production-grade ride-hailing platform built from scratch spanning native iOS & Android clients and a hardened NestJS / PostgreSQL backend.

§ 01

Professional Experience

Aug 2019 — Present

CURRENT

RIYADH, KSA

iOS Tech Lead

Marn — Jahez Group ↗

- Lead and mentor an iOS team of 5+ developers building enterprise POS solutions.
- Architect offline-first systems with CoreData and seamless cloud sync, serving 20k+ restaurants and cafés.
- Design sophisticated table management, order processing, and inventory tracking systems.
- Spearhead the migration to SwiftUI and modern practices (Combine, async/await).
- Optimised performance for 40% faster load times and a 99.8-99.9% crash-free rate.
- Established CI/CD pipelines and automated testing, cutting deployment time by 60%.

Sep 2025 — Dec 2025

VOLUNTEER

iOS Team Lead

HaramBlur ↗ · Voluntary Charity Project

- Designed an architecture integrating on-device machine learning for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimised memory management throughout.

Dec 2025 — Jul 2026

INDEPENDENT

Full-Stack Platform Architect — iOS · Android · Backend · Web

Ride-Hailing Platform · Independent Project

Founded, architected, and shipped a production-grade ride-hailing platform **solo** — four native apps, a hardened backend, and a real-time operations console — **owning every layer** from data model to release, and setting the engineering standards: idempotent mutations, double-entry accounting, acyclic module boundaries, and a CI test suite.

Backend APIs

NestJS · TypeScript · Dec '25 → Jul '26

Modular monolith, ~17 domains — **trip state machine**, **scored dispatch** over a Redis geo index, **double-entry ledger**, realtime rider/driver/admin **sockets**, JWT + phone-OTP, idempotency & audit log · **1,150+ tests**, Swagger docs.

iOS Apps · Rider & Driver

SwiftUI · Jan '26 → Jul '26

Two native **SwiftUI** apps — live **GPS trip lifecycle**, realtime sockets, in-app chat, payments, and driver earnings & turn-by-turn navigation.

Admin Console

Next.js 14 · Feb '26 → Jul '26

Bespoke **19-screen** ops surface — live **MapLibre** trips map, dispatch/SOS live boards, KYC review, finance reconciliation, refunds/payouts, map **zone editor**, **Google SSO**.

Android Apps · Rider & Driver

Kotlin · Jetpack Compose · Mar '26 → Jul '26

Native **Kotlin / Compose** parity for both apps — same trip lifecycle, realtime tracking, chat, and payments across **one shared API contract**.

One backend · one contract · four clients — plus growth loops (promotions, referrals, loyalty tiers, wallet), driver safety/SOS, and scheduled reconciliation jobs, shipped end-to-end.

Mar 2018 — May 2019

RIYADH, KSA

iOS Team Lead

Ego — The Ride Hailing App ↗

- Developed a comprehensive ride-hailing ecosystem (iOS, watchOS) serving 15M+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Sep 2016 — Mar 2018

KSA

Senior iOS Engineer

HungerStation — DeliveryHero Group ↗

- Contributed to a major food-delivery platform serving 20M+ users.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

May 2016 — Aug 2016

iOS Developer

ALNapedh ↗

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spreedly payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 — Sep 2015

iOS & Apple Watch Developer

Nile Design Co. ↗

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted SwiftUI from WWDC 2019 onward.

May 2014 — May 2015

iOS Developer

UK Pro. Solutions Ltd. ↗

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.
