BUSINESSES ON THE
POS I LED

```
/**
 * Chief Technology Officer – 12+ years building, 8+ leading.
 * Seven of them running the iOS org behind a POS platform trusted by 20k+
 * restaurants and cafés: technology strategy, architecture and roadmap, the
 * standards a team runs on, and the answer for delivery.
 * I have also carried the whole technical scope of a founding CTO alone –
 * a production ride-hailing platform I am building solo – iOS & Android,
 * a NestJS / PostgreSQL / Redis backend and a Next.js ops console – so no
 * layer of the stack is a black box when I am deciding for a company.
 */
```

technology_office() ----- 4 pillars

[01] technology strategy

Choose the bets, own the consequences

Stack, architecture and roadmap as one decision – platform choices, module boundaries, data models, security posture, and migrations that keep a codebase current without stalling the business.

7-year production POS moved to SwiftUI
♦ mid-flight

[02] organisation & talent

An engineering function, not a headcount

Seven years building and leading a 5+ engineer team: onboarding, mentoring, career growth, and a review culture where quality is the default.

99.8-99.9% crash-free under enterprise
♦ load

experience() ----- 8 roles

iOS Team Lead @ Marn – Jahez Group

Aug 2019 → Aug 2026

RIYADH, KSA

♦ Led a 5+ engineer iOS team for seven years – onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafés.

♦ Owned the technical roadmap and architecture: an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not.

♦ Set the engineering standards – module boundaries, code review, automated testing – holding the app at a 99.8-99.9% crash-free rate in production.

♦ Drove the multi-year migration to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership.

♦ Built CI/CD and the release process from scratch, cutting deployment time 60% and shortening every engineer's feedback loop.

♦ Ran the performance programme (40% faster load times) and designed the table-management, order-processing and inventory systems at the product's core.

♦ Partnered with product, design and backend leadership on scope, estimates and delivery commitments.

Founding Platform Architect – iOS · Android · Backend · Web @
Ride-Hailing Platform · Independent

Mar 2026 → Present CURRENT

Took the **full technical scope of a founding CTO** and carried it alone – building a production ride-hailing platform **solo**: a hardened backend and a real-time ops console **in production**, with two native **iOS/SwiftUI** apps (Rider & Driver) and their Android counterparts in active development – **owning every layer** and setting the engineering standards (idempotency, double-entry accounting, acyclic module boundaries, CI test suite).

> Backend APIs

// NestJS · TypeScript · Mar '26 → now

Modular monolith, ~17 domains – **trip state machine**, scored **dispatch** over a Redis geo index, **double-entry ledger**, realtime rider/driver/admin **sockets**, JWT + phone-OTP, idempotency & audit log · **1,150+ tests**, Swagger docs.

> Admin Console

// Next.js 14 · Jun '26 → now

Bespoke **19-screen** ops surface – live **MapLibre** trips map, dispatch/SOS live boards, KYC review, finance reconciliation, refunds/payouts, map **zone editor**, **Google SSO**.

> iOS Apps · Rider & Driver

// SwiftUI · Jul '26 → now

Two native **SwiftUI** apps – live GPS **trip lifecycle**, realtime sockets, in-app chat, payments, and driver earnings & turn-by-turn navigation.

> Android Apps · Rider & Driver

// Kotlin · Jetpack Compose · Sep '26 → now

Native **Kotlin / Compose** parity for both apps – same trip lifecycle, realtime tracking, chat, and payments across **one shared API contract**.

One backend · one contract · four clients in flight – plus growth loops (promotions, referrals, loyalty, wallet), driver safety/SOS, and scheduled reconciliation jobs, owned end-to-end.

Senior iOS Engineer @ HaramBlur · voluntary charity project

Dec 2025 → Jun 2026

♦ Designed an architecture integrating **on-device machine learning** for real-time content analysis.

♦ Built a seamless communication layer between native iOS and web-based content.

♦ Implemented efficient image processing with region-based and full-image blur effects.

♦ Created a real-time video monitoring system for continuous content filtering.

♦ Developed smart banner blocking and optimised memory management throughout.

iOS Team Lead @ Ego – Ride Hailing

Mar 2018 → May 2019

RIYADH, KSA

♦ Developed a ride-hailing ecosystem (iOS, watchOS) serving **15M+ users** in Saudi Arabia.

♦ Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.

♦ Integrated Apple Pay, HyperPay, and push-notification infrastructure.

♦ Created seamless iPhone — Apple Watch handoff for continuous ride tracking.

♦ Built the driver rating system and real-time fare calculation engine.

Senior iOS Engineer @ HungerStation – DeliveryHero

Sep 2016 → Mar 2018

KSA

♦ Contributed to a major food-delivery platform serving **20M+ users**.

♦ Optimised app performance for high-volume transaction processing.

♦ Implemented real-time order tracking and delivery optimisation.

♦ Collaborated with backend teams on API design and integration.

iOS Developer @ ALNapedh

May 2016 → Aug 2016

♦ Developed food-ordering apps with Firebase integration and real-time features.

♦ Implemented Speedy payments and live-chat functionality.

♦ Built responsive UI with Auto Layout across multiple device sizes.

iOS & Apple Watch Developer @ Nile Design Co.

Jul 2015 → Sep 2015

♦ Early adopter of Apple Watch development (watchOS 1-2).

♦ Built a foundation in iOS and watchOS app development.

♦ Adopted SwiftUI from WWDC 2019 onward.

iOS Developer @ UK Pro. Solutions Ltd.

May 2014 → May 2015

♦ Foundation iOS experience in Objective-C and early Swift.

♦ Built social networks and e-commerce platforms.

♦ Learned core iOS principles and App Store deployment.

projects[] ----- selected

[01] ai / privacy

HaramBlur – Privacy Browser

SwiftUI · CoreML · WKWebView · CoreImage · Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur, live video monitoring.

AI-powered privacy browser

[02] full-stack

Ride-Hailing Platform

SwiftUI · Kotlin · Jetpack Compose · NestJS · TypeScript · PostgreSQL · Redis · Socket.IO · Next.js

End-to-end ride-hailing system built solo: a hardened NestJS backend (idempotency, double-entry ledger, 1,150+ tests) and a real-time Next.js ops console in production, with four native clients (Rider & Driver on iOS + Android) in active development.

Full-stack ownership · prod security

[03] delivery

HungerStation

UIKit · Firebase · Real-time APIs · Perf

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Performance and real-time order tracking.

4.5 / 5 – 1.9M+ ratings

[04] mobility

Ego – Ride Hailing

MapKit · Core Location · Apple Pay · watchOS

Complete ride-hailing ecosystem: rider, driver, and Apple Watch apps. Real-time GPS and cross-device experiences for 15M+ users.

4.7 / 5 – 211.8k+ ratings

[05] enterprise

Marn – iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise POS serving 20k+ restaurants across Saudi Arabia. Offline-first architecture, complex table management, real-time orders.

4.8 / 5 – 2,437 ratings

[06] community

DaLeelo

MapKit · Core Location · Social SDKs

Muslim community app – prayer times, mosque finder, and community features with enhanced location + social integration.

4.5 / 5 – 1,287 ratings
