Engineering Lead / Engineering Manager

// 12+ years building • 8+ leading teams • Cairo — Riyadh • millions of users across MENA

12+

YEARS ENGINEERING

8+

YEARS LEADING TEAMS

7yrs

LEADING THE SAME TEAM

20k+

BUSINESSES ON THE POS I LED

```
/**
 * Engineering Lead — 12+ years building, 8+ leading, including seven
 * consecutive years running the same 5+ engineer iOS team through a
 * product's growth into an enterprise POS serving 20k+ restaurants.
 * I grow engineers, protect the quality bar, and make delivery predictable:
 * onboarding, mentoring, review culture, CI/CD, and honest estimates with
 * product and design.
 * Still technical throughout: I architect, I review, and I am now building
 * a full ride-hailing platform solo across iOS, Android, backend and web.
 */
```

how_i_run_a_team() ----- 4 pillars

[01] people & growth

Grow engineers, not just features

Seven years with one team — onboarding, mentoring, career conversations, and pairing on the problems that actually teach.

◆ Retention through a seven-year product

[02] delivery & predictability

Estimates the team can keep

CI/CD built from nothing, suites that gate merges, and planning with product and design in commitments nobody walks back.

◆ 60% faster deployments

[03] quality & standards

Quality is a default, not a phase

Module boundaries, review culture and automated testing on an enterprise POS in daily production use.

◆ 99.8-99.9% crash-free • 40% faster load

[04] technical credibility

I can still review any PR on my team

Drove the multi-year SwiftUI migration, and building a full ride-hailing platform solo across iOS, Android, backend and web.

◆ 4 platforms • 1 contract • 1 engineer

experience() ----- 8 roles

iOS Team Lead @ Marn — Jahez Group

Aug 2019 → Aug 2026

RIYADH, KSA

- Led a 5+ engineer iOS team for seven years — onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafés.
- Owned the technical roadmap and architecture: an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not.
- Set the engineering standards — module boundaries, code review, automated testing — holding the app at a 99.8-99.9% crash-free rate in production.
- Drove the multi-year migration to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership.
- Built CI/CD and the release process from scratch, cutting deployment time 60% and shortening every engineer's feedback loop.
- Ran the performance programme (40% faster load times) and designed the table-management, order-processing and inventory systems at the product's core.
- Partnered with product, design and backend leadership on scope, estimates and delivery commitments.

Founding Platform Architect — iOS • Android • Backend • Web @ Ride-Hailing Platform • Independent

Mar 2026 → Present **CURRENT**

Took the full technical scope of a founding CTO and carried it alone — building a production ride-hailing platform solo: a hardened backend and a real-time ops console in production, with two native iOS/SwiftUI apps (Rider & Driver) and their Android counterparts in active development — owning every layer and setting the engineering standards (idempotency, double-entry accounting, acyclic module boundaries, CI test suite).

> Backend APIs

// NestJS • TypeScript • Mar '26 → now

Modular monolith, ~17 domains — trip state machine, scored dispatch over a Redis geo index, double-entry ledger, realtime rider/driver/admin sockets, JWT + phone-OTP, idempotency & audit log • 1,150+ tests, Swagger docs.

> Admin Console

// Next.js 14 • Jun '26 → now

Bespoke 19-screen ops surface — live MapLibre trips map, dispatch/SOS live boards, KYC review, finance reconciliation, refunds/payouts, map zone editor, Google SSO.

> iOS Apps • Rider & Driver

// SwiftUI • Jul '26 → now

Two native SwiftUI apps — live GPS trip lifecycle, realtime sockets, in-app chat, payments, and driver earnings & turn-by-turn navigation.

> Android Apps • Rider & Driver

// Kotlin • Jetpack Compose • Sep '26 → now

Native Kotlin / Compose parity for both apps — same trip lifecycle, realtime tracking, chat, and payments across one shared API contract.

One backend, • one contract • four clients in flight — plus growth loops (promotions, referrals, loyalty, wallet), driver safety/SOS, and scheduled reconciliation jobs, owned end-to-end.

Senior iOS Engineer @ HaramBlur • voluntary charity project

Dec 2025 → Jun 2026

- Designed an architecture integrating on-device machine learning for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimised memory management throughout.

iOS Team Lead @ Ego — Ride Hailing

Mar 2018 → May 2019

RIYADH, KSA

- Developed a ride-hailing ecosystem (iOS, watchOS) serving 15M+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone — Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Senior iOS Engineer @ HungerStation — DeliveryHero

Sep 2016 → Mar 2018

KSA

- Contributed to a major food-delivery platform serving 20M+ users.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

iOS Developer @ ALNapedh

May 2016 → Aug 2016

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Speedly payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

iOS & Apple Watch Developer @ Nile Design Co.

Jul 2015 → Sep 2015

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted SwiftUI from WWDC 2019 onward.

iOS Developer @ UK Pro. Solutions Ltd.

May 2014 → May 2015

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

projects[] ----- selected

[01] ai / privacy

HaramBlur — Privacy Browser

SwiftUI • CoreML • WKWebView • CoreImage • Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur, live video monitoring.

◆ AI-powered privacy browser

[02] full-stack

Ride-Hailing Platform

SwiftUI • Kotlin • Jetpack Compose • NestJS • TypeScript • PostgreSQL • Redis • Socket.IO • Next.js

End-to-end ride-hailing system built solo: a hardened NestJS backend (idempotency, double-entry ledger, 1,150+ tests) and a real-time Next.js ops console in production, with four native clients (Rider & Driver on iOS + Android) in active development.

◆ Full-stack ownership • prod security

[03] delivery

HungerStation

UIKit • Firebase • Real-time APIs • Perf

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Performance and real-time order tracking.

★ 4.5 / 5 — 1.9M+ ratings

[04] mobility

Ego — Ride Hailing

MapKit • Core Location • Apple Pay • watchOS

Complete ride-hailing ecosystem: rider, driver, and Apple Watch apps. Real-time GPS and cross-device experiences for 15M+ users.

★ 4.7 / 5 — 211.8k+ ratings

[05] enterprise

Marn — iPad POS

SwiftUI • CoreData • CloudKit • Real-time Sync

Enterprise POS serving 20k+ restaurants across Saudi Arabia. Offline-first architecture, complex table management, real-time orders.

★ 4.8 / 5 — 2,437 ratings

[06] community

Daleelo

MapKit • Core Location • Social SDKs

Muslim community app — prayer times, mosque finder, and community features with enhanced location + social integration.

★ 4.5 / 5 — 1,287 ratings
