Engineering leader with **12+ years** building and **8+ leading** — including **seven consecutive years** running the same **5+ engineer iOS team** through a product's growth from launch scale to an enterprise POS serving 20k+ restaurants and cafés. I grow engineers, protect the quality bar, and make delivery predictable: onboarding, mentoring, review culture, CI/CD, and honest estimates with product and design. I stayed technical the whole time — I still architect, still review, and I am now building a full ride-hailing platform solo across iOS, Android, backend and web.

12+ YEARS IN ENGINEERING	8+ YEARS LEADING ENGINEERING TEAMS	7yrs LEADING THE SAME iOS TEAM	20k+ BUSINESSES SERVED BY THE POS I LED
--	--	--	---

§ 01 How I Run a Team

01 — PEOPLE & GROWTH Grow engineers, not just features Seven years with one team: onboarding that gets a new engineer productive fast, mentoring and career conversations, and pairing on the problems that teach. Retention through a seven-year product is the result I am proudest of — the same people got better, together.	02 — DELIVERY & PREDICTABILITY Estimates the team can keep CI/CD and release automation built from nothing (60% faster deployments), suites that gate merges, and planning with product and design in commitments nobody has to walk back. Scope conversations happen before the sprint, not during it.
--	---

03 — QUALITY & STANDARDS Quality is a default, not a phase Module boundaries, review culture, and automated testing that held an enterprise POS at a 99.8-99.9% crash-free rate in production — plus a performance programme that made the app 40% faster to load.	04 — TECHNICAL CREDIBILITY I can still review any PR on my team I lead technically as well as organisationally: I drove the multi-year SwiftUI/Combine/async-await migration, and I am architecting and building a production ride-hailing platform solo across iOS, Android, a NestJS backend and a Next.js console.
---	---

§ 02 Professional Experience

Aug 2019 — Aug 2026 RIYADH, KSA	iOS Team Lead — 7 years leading the iOS org Marn — Jahez Group ↗ - Led a 5+ engineer iOS team for seven years — onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafés. - Owned the technical roadmap and architecture: an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not. - Set the engineering standards — module boundaries, code review, automated testing — that held the app at a 99.8-99.9% crash-free rate in production. - Drove the multi-year migration to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership. - Built CI/CD and the release process from scratch, cutting deployment time 60% and shortening every engineer's feedback loop. - Ran the performance programme (40% faster load times) and designed the table-management, order-processing and inventory systems at the heart of the product. - Partnered with product, design and backend leadership on scope, estimates and delivery commitments the team could keep.
---	---

Mar 2026 — Present CURRENT INDEPENDENT	Founding Platform Architect — iOS · Android · Backend · Web Ride-Hailing Platform · Independent Project Took the full technical scope of a founding CTO and carried it alone: chose the stack, set the standards, and have been building a production ride-hailing platform — a hardened backend and a real-time ops console in production, with two native iOS/SwiftUI apps (Rider & Driver) and their Android counterparts in active development. Every layer from data model to release, governed by explicit rules: idempotent mutations, double-entry accounting, acyclic module boundaries, and a CI test suite that gates the merge.
---	---

Backend APIs NestJS · TypeScript · Mar '26 → now	Modular monolith, ~17 domains — trip state machine, scored dispatch over a Redis geo index, double-entry ledger, realtime rider/driver/admin sockets, JWT + phone-OTP, idempotency & audit log · 1,150+ tests, Swagger docs.
--	--

Admin Console Next.js 14 · Jun '26 → now	Bespoke 19-screen ops surface — live MapLibre trips map, dispatch/iOS live boards, KYC review, finance reconciliation, refunds/payouts, map zone editor, Google SSO.
--	---

iOS Apps · Rider & Driver SwiftUI · Jul '26 → now	Two native SwiftUI apps — live GPS trip lifecycle, realtime sockets, in-app chat, payments, and driver earnings & turn-by-turn navigation.
---	---

Android Apps · Rider & Driver Kotlin · Jetpack Compose · Sep '26 → now	Native Kotlin / Compose parity for both apps — same trip lifecycle, realtime tracking, chat, and payments across one shared API contract.
--	--

One backend · one contract · four clients in flight — plus growth loops (promotions, referrals, loyalty tiers, wallet), driver safety/SOS, and scheduled reconciliation jobs. The exercise a technical leader needs periodically: own every trade-off yourself, then know exactly what you are asking of a team.

Dec 2025 — Jun 2026 VOLUNTEER	Senior iOS Engineer HaramBlur ↗ · Voluntary Charity Project - Designed an architecture integrating on-device machine learning for real-time content analysis. - Built a seamless communication layer between native iOS and web-based content. - Implemented efficient image processing with region-based and full-image blur effects. - Created a real-time video monitoring system for continuous content filtering. - Developed smart banner blocking and optimised memory management throughout.
---	---

Mar 2018 — May 2019 RIYADH, KSA	iOS Team Lead Ego — The Ride Hailing App ↗ - Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 15M+ users in Saudi Arabia. - Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms. - Integrated Apple Pay, HyperPay, and push-notification infrastructure. - Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking. - Built the driver rating system and real-time fare calculation engine.
---	---

Sep 2016 — Mar 2018 KSA	Senior iOS Engineer HungerStation — DeliveryHero Group ↗ - Contributed to a major food-delivery platform serving 20M+ users. - Optimised app performance for high-volume transaction processing. - Implemented real-time order tracking and delivery optimisation. - Collaborated with backend teams on API design and integration.
---	--

May 2016 — Aug 2016	iOS Developer ALNapedh ↗ - Developed food-ordering apps with Firebase integration and real-time features. - Implemented Spreedly payments and live-chat functionality. - Built responsive UI with Auto Layout across multiple device sizes.
--------------------------------	--

Jul 2015 — Sep 2015	iOS & Apple Watch Developer Nile Design Co. ↗ - Early adopter of Apple Watch development (watchOS 1-2). - Built a foundation in iOS and watchOS app development. - Adopted SwiftUI from WWDC 2019 onward.
--------------------------------	--

May 2014 — May 2015	iOS Developer UK Pro. Solutions Ltd. ↗ - Foundation iOS experience in Objective-C and early Swift. - Built social networks and e-commerce platforms. - Learned core iOS principles and App Store deployment.
--------------------------------	---

§ 03 Selected Projects

01 — FULL-STACK Ride-Hailing Platform (built from scratch · since Mar 2026) SwiftUI · Kotlin · Jetpack Compose · NestJS · TypeScript · PostgreSQL · Redis · Socket.IO · Next.js End-to-end ride-hailing platform architected solo: a hardened NestJS backend (trip state machine, scored dispatch, double-entry ledger, realtime sockets, 1,150+ tests) and a real-time Next.js operations console in production, with four native clients (Rider & Driver on iOS/SwiftUI and Android/Kotlin-Compose) in active development. Four Platforms · Solo Ownership · Production Security	02 — ENTERPRISE Marn — iPad POS SwiftUI · CoreData · CloudKit · Real-time Sync Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, complex table management, real-time order processing — the product my iOS team owned for seven years. 4.8 / 5 — 2,437 ratings
---	---

03 — MOBILITY Ego — Ride Hailing MapKit · Core Location · Apple Pay · Push · watchOS Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for 15M+ users. 4.7 / 5 — 211.8k+ ratings	04 — DELIVERY HungerStation UIKit · Firebase · Real-time APIs · Perf Optimization Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Focused on performance and real-time order tracking. 4.5 / 5 — 1.9M+ ratings
---	--

05 — AI / PRIVACY HaramBlur — Privacy Browser SwiftUI · CoreML · WKWebView · CoreImage · Vision Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur effects, and live video monitoring. AI-Powered Privacy Browser	06 — COMMUNITY Daleelo MapKit · Core Location · Social SDKs · Community Muslim community app for users across the US — prayer times, mosque finder, and community features with enhanced location and social integration. 4.5 / 5 — 1,287 ratings
--	--

§ 04 Stack & Craft

ENGINEERING LEADERSHIP	ORG
Team Leadership	Technical Direction
Architecture Governance	Technical Roadmap
Mentoring & Career Growth	Onboarding
Code Review Culture	Estimation & Planning
Cross-functional Partnership	Quality & Crash Budgets
Release Management	Agile / Scrum

iOS — 2025	CORE
Swift 6.0	SwiftUI
UIKit	Combine
async/await	
SwiftData	iOS 18+

ANDROID — 2025	NATIVE

ISTQB Foundation Level
Egyptian Software Testing Qualification Board

device machine learning for real-time

between native iOS and web-based content.

with region-based and full-image blur

system for continuous content filtering

§ 07 Honours

01	Led an iOS engineering team for 7 consecutive years on a POS platform serving 20k+ restaurants and cafés — through the product's growth from launch scale to enterprise.
----	--

02	Held a 99.8-99.9% crash-free rate and cut deployment time 60% by building the standards, tests and CI/CD the team ran on.
----	---

03	Architecting a full-stack ride-hailing platform solo — NestJS/PostgreSQL backend and Next.js ops console in production, four native clients (iOS + Android) in development, with idempotent APIs and double-entry accounting.
----	--

04	Built a food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving 15M+ users in Saudi Arabia.
----	---

05	10+ apps published on the App Store, used by millions across MENA.
----	---

06	30+ projects delivered across a 12-year career.
----	--

07	Early Swift adopter (WWDC 2014) and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.
----	---
