Technical lead with **12+ years** hands-on and **8+ leading** — the engineer a team's hardest problems land on. For seven years I owned the architecture of an enterprise POS used by **20k+** restaurants and cafés: an offline-first CoreData core with cloud sync, the module boundaries, the review bar, and the multi-year SwiftUI migration that kept it modern without pausing delivery. I lead by building — right now a production ride-hailing platform I am architecting and building **solo** across native iOS & Android, a NestJS / PostgreSQL / Redis backend, and a Next.js operations console.

12+ YEARS HANDS-ON	8+ YEARS LEADING ENGINEERING TEAMS	35M+ USERS REACHED ACROSS SHIPPED APPS	30+ PROJECTS DELIVERED
--	--	--	--

§ 01 How I Lead Technically

01 — ARCHITECTURE & DIRECTION Own the shape of the system Module boundaries, data models, and the offline-first CoreData + cloud-sync core of an enterprise POS — built so a venue keeps trading when the network does not. Plus the migration plans that keep a codebase current without stalling delivery.	02 — STANDARDS IN CODE The bar is a diff, not a document Review culture, automated tests that gate merges, and CI/CD built from nothing (60% faster deployments). The standards I wrote and enforced held the app at a 99.8-99.9% crash-free rate in production.
--	---

03 — MENTORING AT THE KEYBOARD Lead by building alongside Seven years mentoring a 5+ engineer team through pairing, design review, and the kind of feedback that makes the next PR better. Technical direction lands faster when the lead is in the codebase too.	04 — WHOLE-STACK DEPTH Credible at every layer iOS & Android clients, NestJS/PostgreSQL/Redis backends, Next.js consoles — I am building and running all four layers of a production platform solo: trip state machine, scored dispatch over a Redis geo index, double-entry ledger, realtime sockets, 1,150+ tests.
---	---

§ 02 Professional Experience

Aug 2019 — Aug 2026
RIYADH, KSA

iOS Team Lead — 7 years leading the iOS org
[Marn — Jahez Group ↗](#)

- Led a **5+ engineer iOS team** for seven years — onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafés.
- Owned the **technical roadmap and architecture**: an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not.
- Set the **engineering standards** — module boundaries, code review, automated testing — that held the app at a 99.8-99.9% crash-free rate in production.
- Drove the **multi-year migration** to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership.
- Built **CI/CD and the release process from scratch**, cutting deployment time 60% and shortening every engineer's feedback loop.
- Ran the performance programme (40% faster load times) and designed the table-management, order-processing and inventory systems at the heart of the product.
- Partnered with product, design and backend leadership on scope, estimates and delivery commitments the team could keep.

Mar 2026 — Present
CURRENT
INDEPENDENT

Founding Platform Architect — iOS · Android · Backend · Web
[Ride-Hailing Platform · Independent Project](#)

Took the **full technical scope of a founding CTO** and carried it alone: chose the stack, set the standards, and have been building a production ride-hailing platform — a hardened backend and a real-time ops console **in production**, with two native **iOS/SwiftUI** apps (Rider & Driver) and their Android counterparts in active development. Every layer from data model to release, governed by explicit rules: idempotent mutations, double-entry accounting, acyclic module boundaries, and a CI test suite that gates the merge.

Backend APIs
NestJS · TypeScript · Mar '26 → now

Modular monolith, ~17 domains — **trip state machine, scored dispatch** over a Redis geo index, **double-entry ledger**, realtime rider/driver/admin **sockets**, JWT + phone-OTP, idempotency & audit log · **1,150+ tests**, Swagger docs.

Admin Console
Next.js 14 · Jun '26 → now

Bespoke **19-screen** ops surface — live **MapLibre** trips map, dispatch/SOS live boards, KYC review, finance reconciliation, refunds/payouts, map **zone editor**, **Google SSO**.

iOS Apps · Rider & Driver
SwiftUI · Jul '26 → now

Two native **SwiftUI** apps — live **GPS trip lifecycle**, realtime sockets, in-app chat, payments, and driver earnings & turn-by-turn navigation.

Android Apps · Rider & Driver
Kotlin · Jetpack Compose · Sep '26 → now

Native **Kotlin / Compose** parity for both apps — same trip lifecycle, realtime tracking, chat, and payments across **one shared API contract**.

One backend · one contract · four clients in flight — plus growth loops (promotions, referrals, loyalty tiers, wallet), driver safety/SOS, and scheduled reconciliation jobs. The exercise a technical leader needs periodically: own every trade-off yourself, then know exactly what you are asking of a team.

Dec 2025 — Jun 2026
VOLUNTEER

Senior iOS Engineer
[HaramBlur ↗ · Voluntary Charity Project](#)

- Designed an architecture integrating on-device machine learning for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimised memory management throughout.

Mar 2019 — May 2019
RIYADH, KSA

iOS Team Lead
[Ego — The Ride Hailing App ↗](#)

- Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 15M+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone — Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Sep 2016 — Mar 2018
KSA

Senior iOS Engineer
[HungerStation — DeliveryHero Group ↗](#)

- Contributed to a major food-delivery platform serving 20M+ users.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

May 2016 — Aug 2016

iOS Developer
[ALNapedh ↗](#)

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spreedly payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 — Sep 2015

iOS & Apple Watch Developer
[Nile Design Co. ↗](#)

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted SwiftUI from WWDC 2019 onward.

May 2014 — May 2015

iOS Developer
[UK Pro. Solutions Ltd. ↗](#)

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

§ 03 Selected Projects

01 — FULL-STACK Ride-Hailing Platform (built from scratch · since Mar 2026) SwiftUI · Kotlin · Jetpack Compose · NestJS · TypeScript · PostgreSQL · Redis · Socket.IO · Next.js End-to-end ride-hailing platform architected solo: a hardened NestJS backend (trip state machine, scored dispatch, double-entry ledger, realtime sockets, 1,150+ tests) and a real-time Next.js operations console in production, with four native clients (Rider & Driver on iOS/SwiftUI and Android/Kotlin-Compose) in active development. Four Platforms · Solo Ownership · Production Security	02 — ENTERPRISE Marn — iPad POS SwiftUI · CoreData · CloudKit · Real-time Sync Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, complex table management, real-time order processing — the product my iOS team owned for seven years. 4.8 / 5 — 2,437 ratings
03 — MOBILITY Ego — Ride Hailing MapKit · Core Location · Apple Pay · Push · watchOS Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for 15M+ users. 4.7 / 5 — 211.8k+ ratings	04 — DELIVERY HungerStation UIKit · Firebase · Real-time APIs · Perf Optimization Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Focused on performance and real-time order tracking. 4.5 / 5 — 1.9M+ ratings
05 — AI / PRIVACY HaramBlur — Privacy Browser SwiftUI · CoreML · WKWebView · CoreImage · Vision Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur effects, and live video monitoring. AI-Powered Privacy Browser	06 — COMMUNITY Daleelo MapKit · Core Location · Social SDKs · Community Muslim community app for users across the US — prayer times, mosque finder, and the community features with enhanced location and social integration. 4.5 / 5 — 1,287 ratings

§ 07 Honours

- Led an iOS engineering team for **7 consecutive years** on a **POS platform** serving **20k+ restaurants** and cafés — through the product's growth from launch scale to enterprise.
- Held a **99.8-99.9% crash-free rate** and **cut deployment time 60%** by building the standards, tests and CI/CD the team ran on.
- Architecting a **full-stack ride-hailing platform solo** — NestJS/PostgreSQL backend and Next.js ops console in production, four native clients (iOS + Android) in development, with idempotent APIs and double-entry accounting.
- Built a food-delivery platform serving **20M+ users** across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving **15M+ users** in Saudi Arabia.
- 10+ apps** published on the App Store, used by millions across MENA.
- 30+ projects** delivered across a 12-year career.
- Early Swift adopter (WWDC 2014) and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.
