Mobile Team Lead with **12+ years** building and leading iOS teams that ship at scale. I grow engineers through **mentoring and code review**, own the technical roadmap and delivery, and architect the systems behind them — from an enterprise POS used by 20k+ restaurants to ride-hailing and delivery apps serving millions across the MENA region. Full-stack range when it counts, with a production platform built end-to-end on SwiftUI and a hardened NestJS / PostgreSQL backend.
